

Modern Instructional Mindsets, Modern Learning Spaces: When Learning Needs Drive Design Decisions

Friday, Oct. 27th, 2pm

*Presenters: Jacqueline Abair, Paul Bianchi, Jessica Marchetti,
Lauralyn Stewart, Thomas Witmer*

Learning Objectives:

1. To understand some research-based instructional practices to be supported by modern learning spaces
2. To learn how these practices are operationalized in a space
3. To compare the timeline and process of modernizing spaces and modernizing teaching and learning across a district
4. To consider barriers to successful collaborations, and possibilities for improvement

Big Picture

"How can the District ensure that all students think deeply, support their thinking, apply problem-solving skills, and actively participate in their learning as they acquire content knowledge?"

- Education in the 21st century
- Project-based (or active) learning
- Advances in school design, architecture, technology and furniture

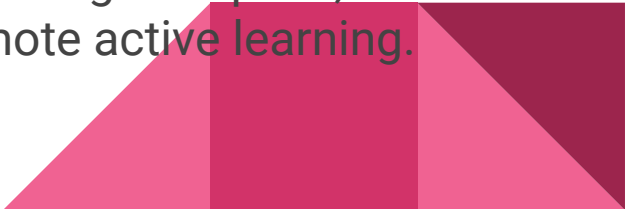

Application

Teachers and students are currently utilizing innovative spaces to extend current classroom work to further incorporate:

- Creativity, problem solving, and multi-disciplinary projects
- In-depth inquiry
- Formulating questions and researching
- Task-based self-directed learning
- Communicating work to a variety of audiences
- Assessment and feedback of on-going learning

Innovative spaces empower teachers and students by providing the space, resources and technology to foster collaboration and promote active learning.

Background

- In the Fall of 2011, the Chappaqua Central School District formed a new committee, the Chappaqua Education for the Future (CEFF).
- CEFF identified 3 core values for the school district in the 21st Century: Creativity, Communication and Collaboration, and Social/Emotional/Physical Health
- In the Spring of 2012, the school district commenced a feasibility study to explore collaborative learning spaces and hired architecture firm.

- Excerpted from INNOVATIVE, INSPIRING SPACES FOR 21ST CENTURY LEARNING, Presentation by Eric Byrne, Ed.D for the **2nd International Ohalo Conference for Innovative Education**.

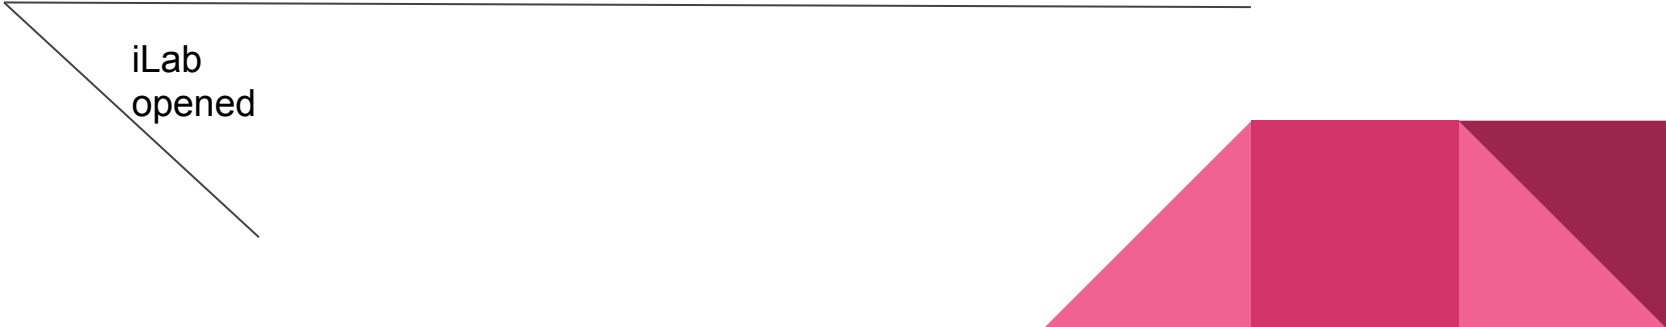

iLab

- iLab first piloted in February 2014
 - Supported through Chappaqua Innovation Fellows
 - Focused on exploring the use of time, flexible space and technology – through Project-based learning, interdisciplinary connections, collaboration, and feedback
 - Spread school wide

STEAM Spaces in Secondary School

Science teachers have traditionally been keenly aware of lab design:

- students working individually, in groups, doing experiments
 - storage and distribution of lab equipment
 - access to water, electricity, gas, and safety equipment
- 

Good lab design: lessons learned

- Appropriately sized furniture
- Movable furniture for a flexible space
- Large uncluttered table-tops
- Storage and utilities at the perimeter

The Physics lab classroom

Maker spaces

- An extension of the science lab, similar design priorities
- Greater emphasis on direct student access to equipment, safety
- Storage for materials, student project work

HG Maker Space

STEAM Learning Center -- G/K Buildings

Present

Proposed

Bond

- 42 million dollar bond passed and construction began in 2017
- Global learning communities
- Maker Spaces
- STEAM Labs
- Instructional Centers

TIMELINE

Professional Learning

Changing **PHYSICAL** space and
MENTAL space.

- Just changing the space will not change teaching.
- Time to vision, play, learn, explore

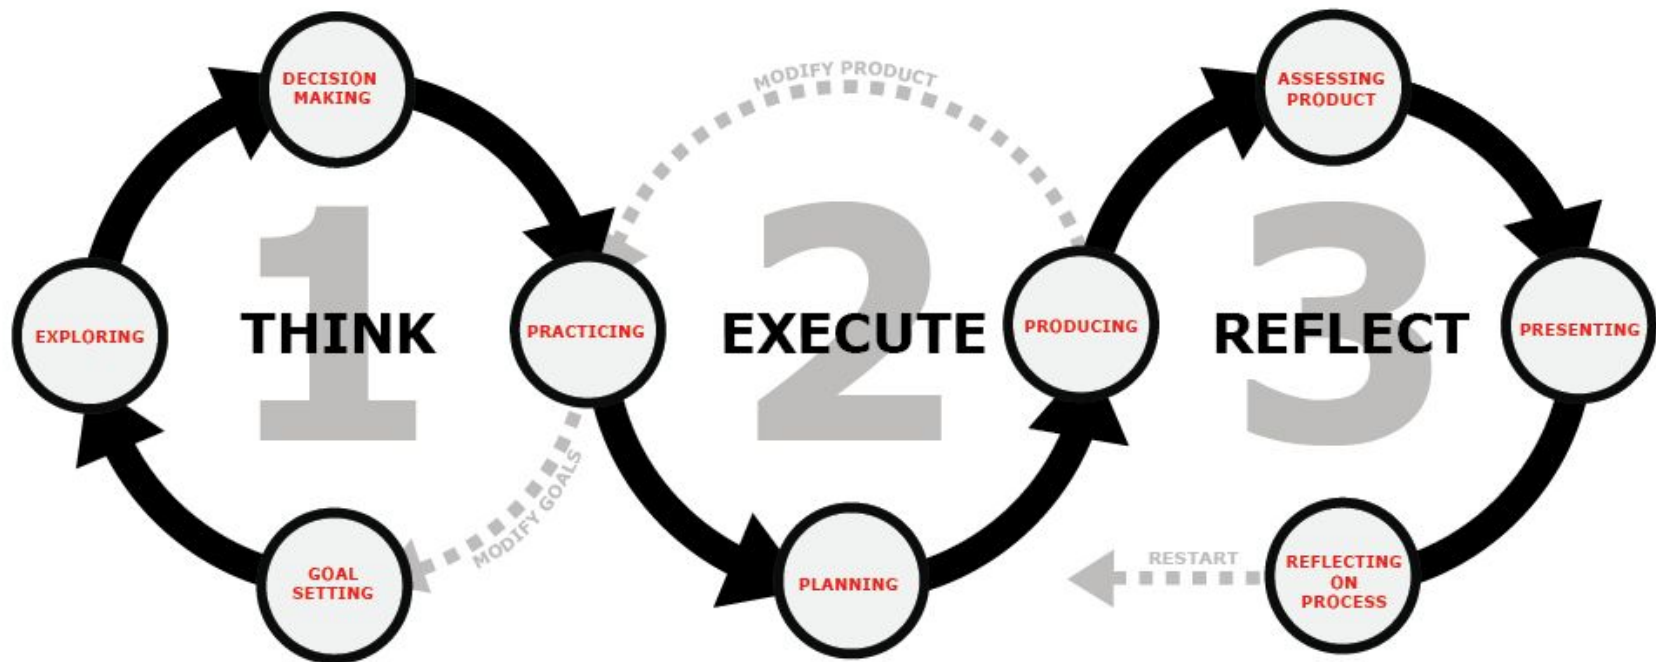

Professional Learning: Collaboration and Inquiry

- Learning Teams, Fellowships, Inquiry Groups
- Student focus groups
- Partnerships with architects and curriculum coaches
- School visits - within and outside the district

CCSD STEAM - PBL Philosophy and Purpose

Principles We believe in learning experiences which are...	Outcomes We believe in curriculum that fosters the development of...	Assessment We believe in anchoring assessment in the design process, with emphasis on...	Methods & Practices We believe in a PBL model of instruction that focuses on...	Structures & Systems We believe in facilitating learning for students and staff by incorporating...	Educational Environment We believe that spaces should...

Middle School Learning Lab

Professional Learning: Community Involvement

- Board presentations
- Knowledge Cafes
- Learning Symposiums
- Panel presentations with parents
- Faculty proposal reviews
- Small Learning Communities

- 1) Design Commons
- 2) Design Studio
- 3) 3D Lab
- 4) CNC Room
- 5) Presentation Area
- 6) Art Studio
- 7) Fabrication Lab
- 8) Maker Space/Robotics Lab
- 9) Storage

Middle School STEAM Centers

- 1) Presentation/Critique Space
- 2) Design Studio
- 3) Fabrication Lab
- 4) 3D Lab
- 5) Fabrication Shop
- 6) CNC Room
- 7) Project and Material Storage
- 8) Electrical/Storage
- 9) Storage
